Sep 18, 2024

[19] The mythos... by Wenshan

[18] Explanation... by Wenshan

[21] Stop explaining black box... by Ming Li

About presentation

"official guidelines": the Week 0 slides (P28-29)

Feel ownership over your presentation: e.g., https://youtu.be/rkQ-5u0C4ag?si=yV2T4jiWstT4lf-7 is too good.

An informal manner: discussing what you think the paper covers—its motivation, methods, results—and adding your own insights and thoughts.

Role play? I'd love to, but unfortunately our papers are more diverse …

Presentation options

1. A half-good conference presentation

2. An informal conversation: discussing what you think the paper covers with the rest of the class.

3. Informal role play? possible roles:
Reviewer 2
An end-user
The author who makes the charts: replicating those charts
A PhD student in X field
Say how this paper might be helpful for your role

My questions

1. Did you receive Canvas notifications?

2. Two of you signed up for 1 paper; one person had a last-minute change

Assignment Q.1

Example demo: https://osf.io/xvswn

Questions?
