

About tools

D3.js: ~~one~~ of the most popular libraries for creating custom data vis
flexibility, large community, extensive documentation, web-based

Vega, Vega-Lite, Plotly, Plotly.js: simplicity over customization

R ggplot: publication-quality visuals, uncertainty visualization

Python Seaborn, Matplotlib: similar but also more limited

Tableau, Power BI: non-programming data analysis tools

The JavaScript library for bespoke data visualization

Create custom dynamic visualizations
with unparalleled flexibility
