

Lab 9: Spirial Days

Data based on Google's [COVID-19 Open Data Repository](#). We use the USA column in *Epidemiology.csv* and set 'NA' to 0. Here we draw use the same scale for all bar height. It seems that neither New Times's cyclic time or those redesigns gave us the whole picture.

Lab 11: U.S. Election Map (State-level)

Source: [MIT Election Data + Science Lab](#)

Two Assignments

13% each: Programming + writing. You can use AI. **Four** Slack days.

You submit a link to your demo and a video.

We aim to finish grading within a week.

So regrading must be requested **within a week** after grades are out.
