Reasonable aspect ratio

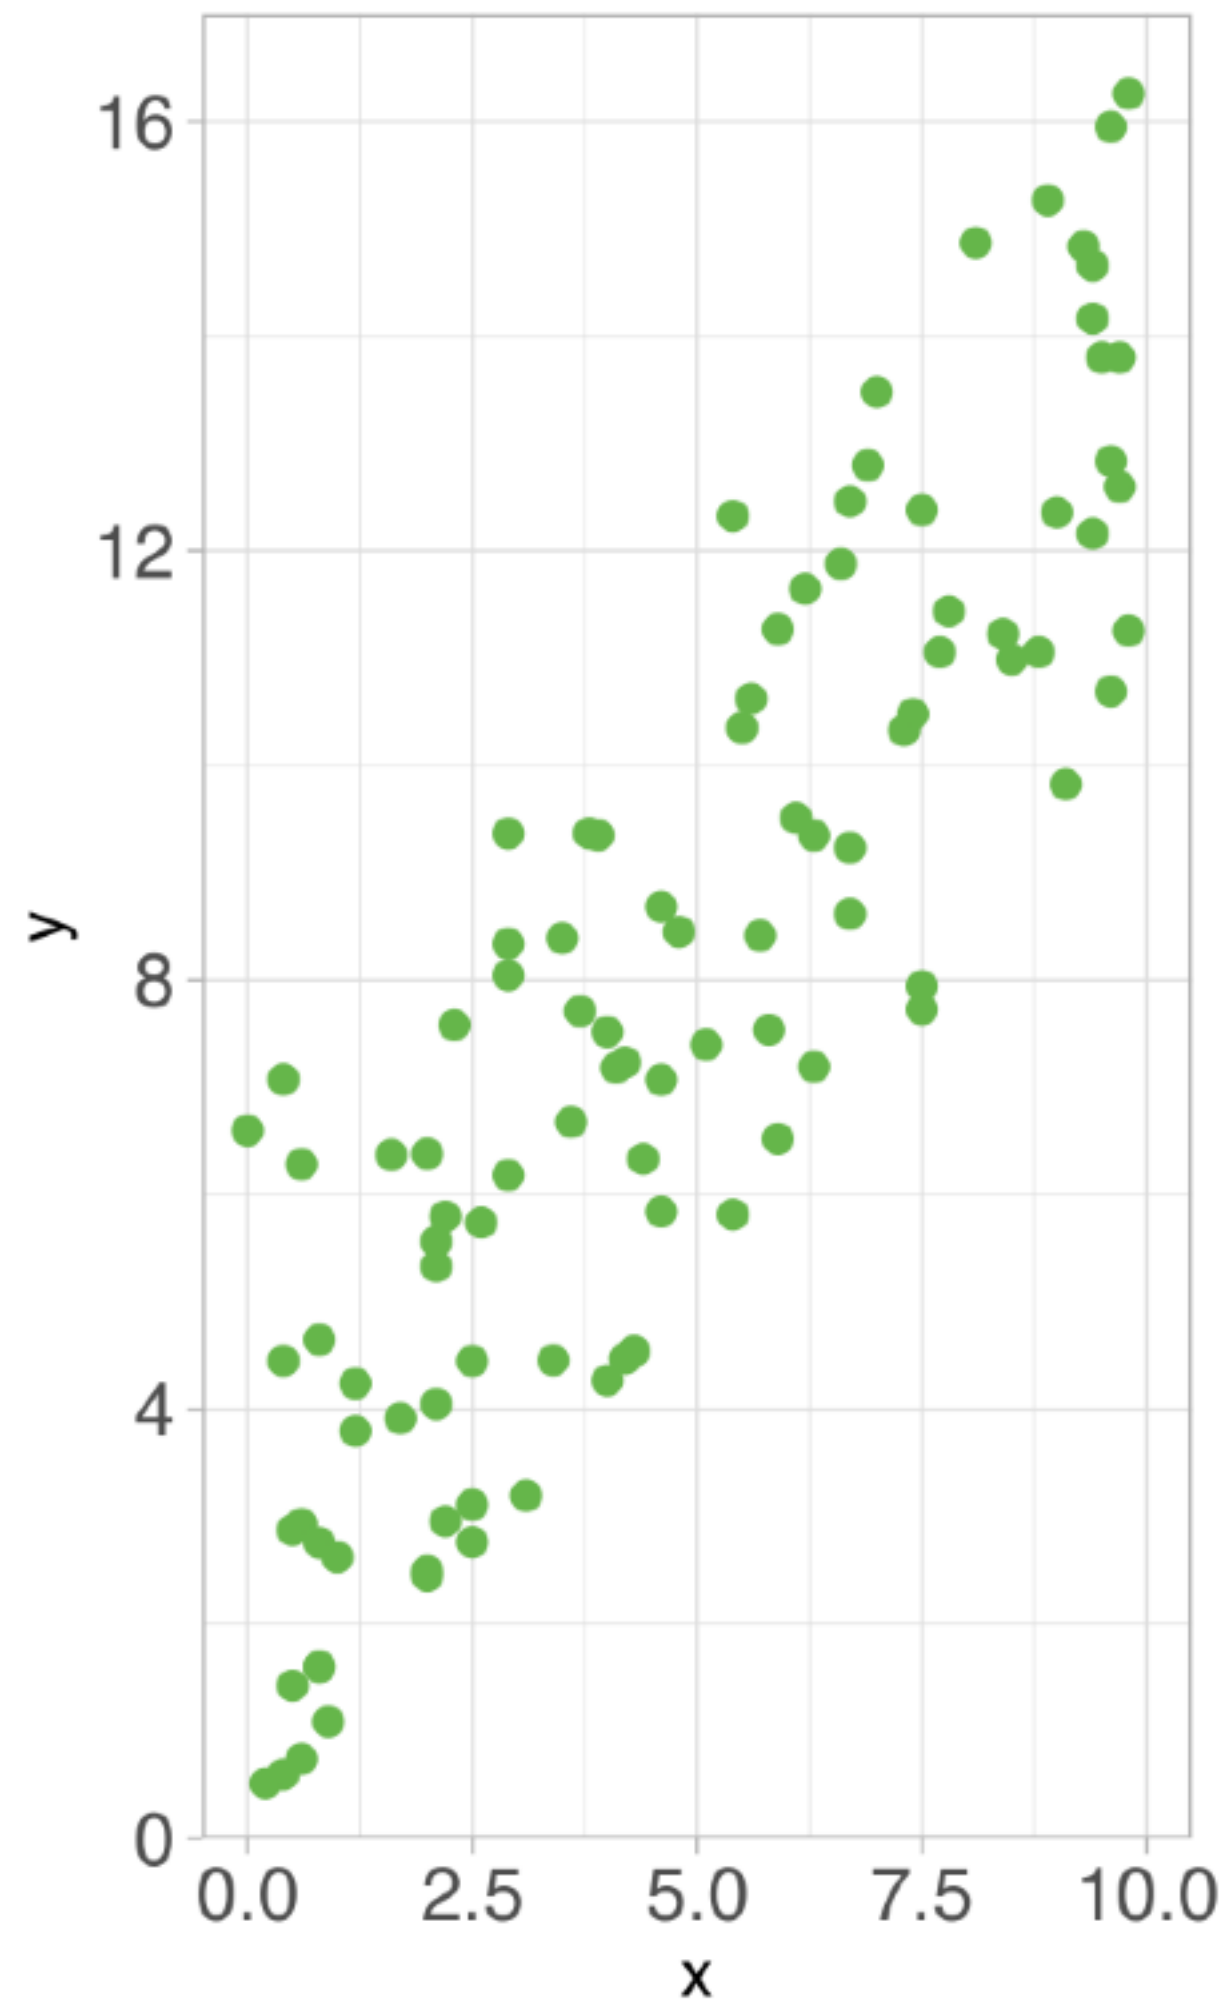

Use aspect ratio (**visual**) to reflect **data** ratio

$y_{diff} \approx 17$, $x_{diff} \approx 10$, so $y:x \approx 1.7$

35% increase $\approx 1/3 \approx 1:3$ aspect ratio

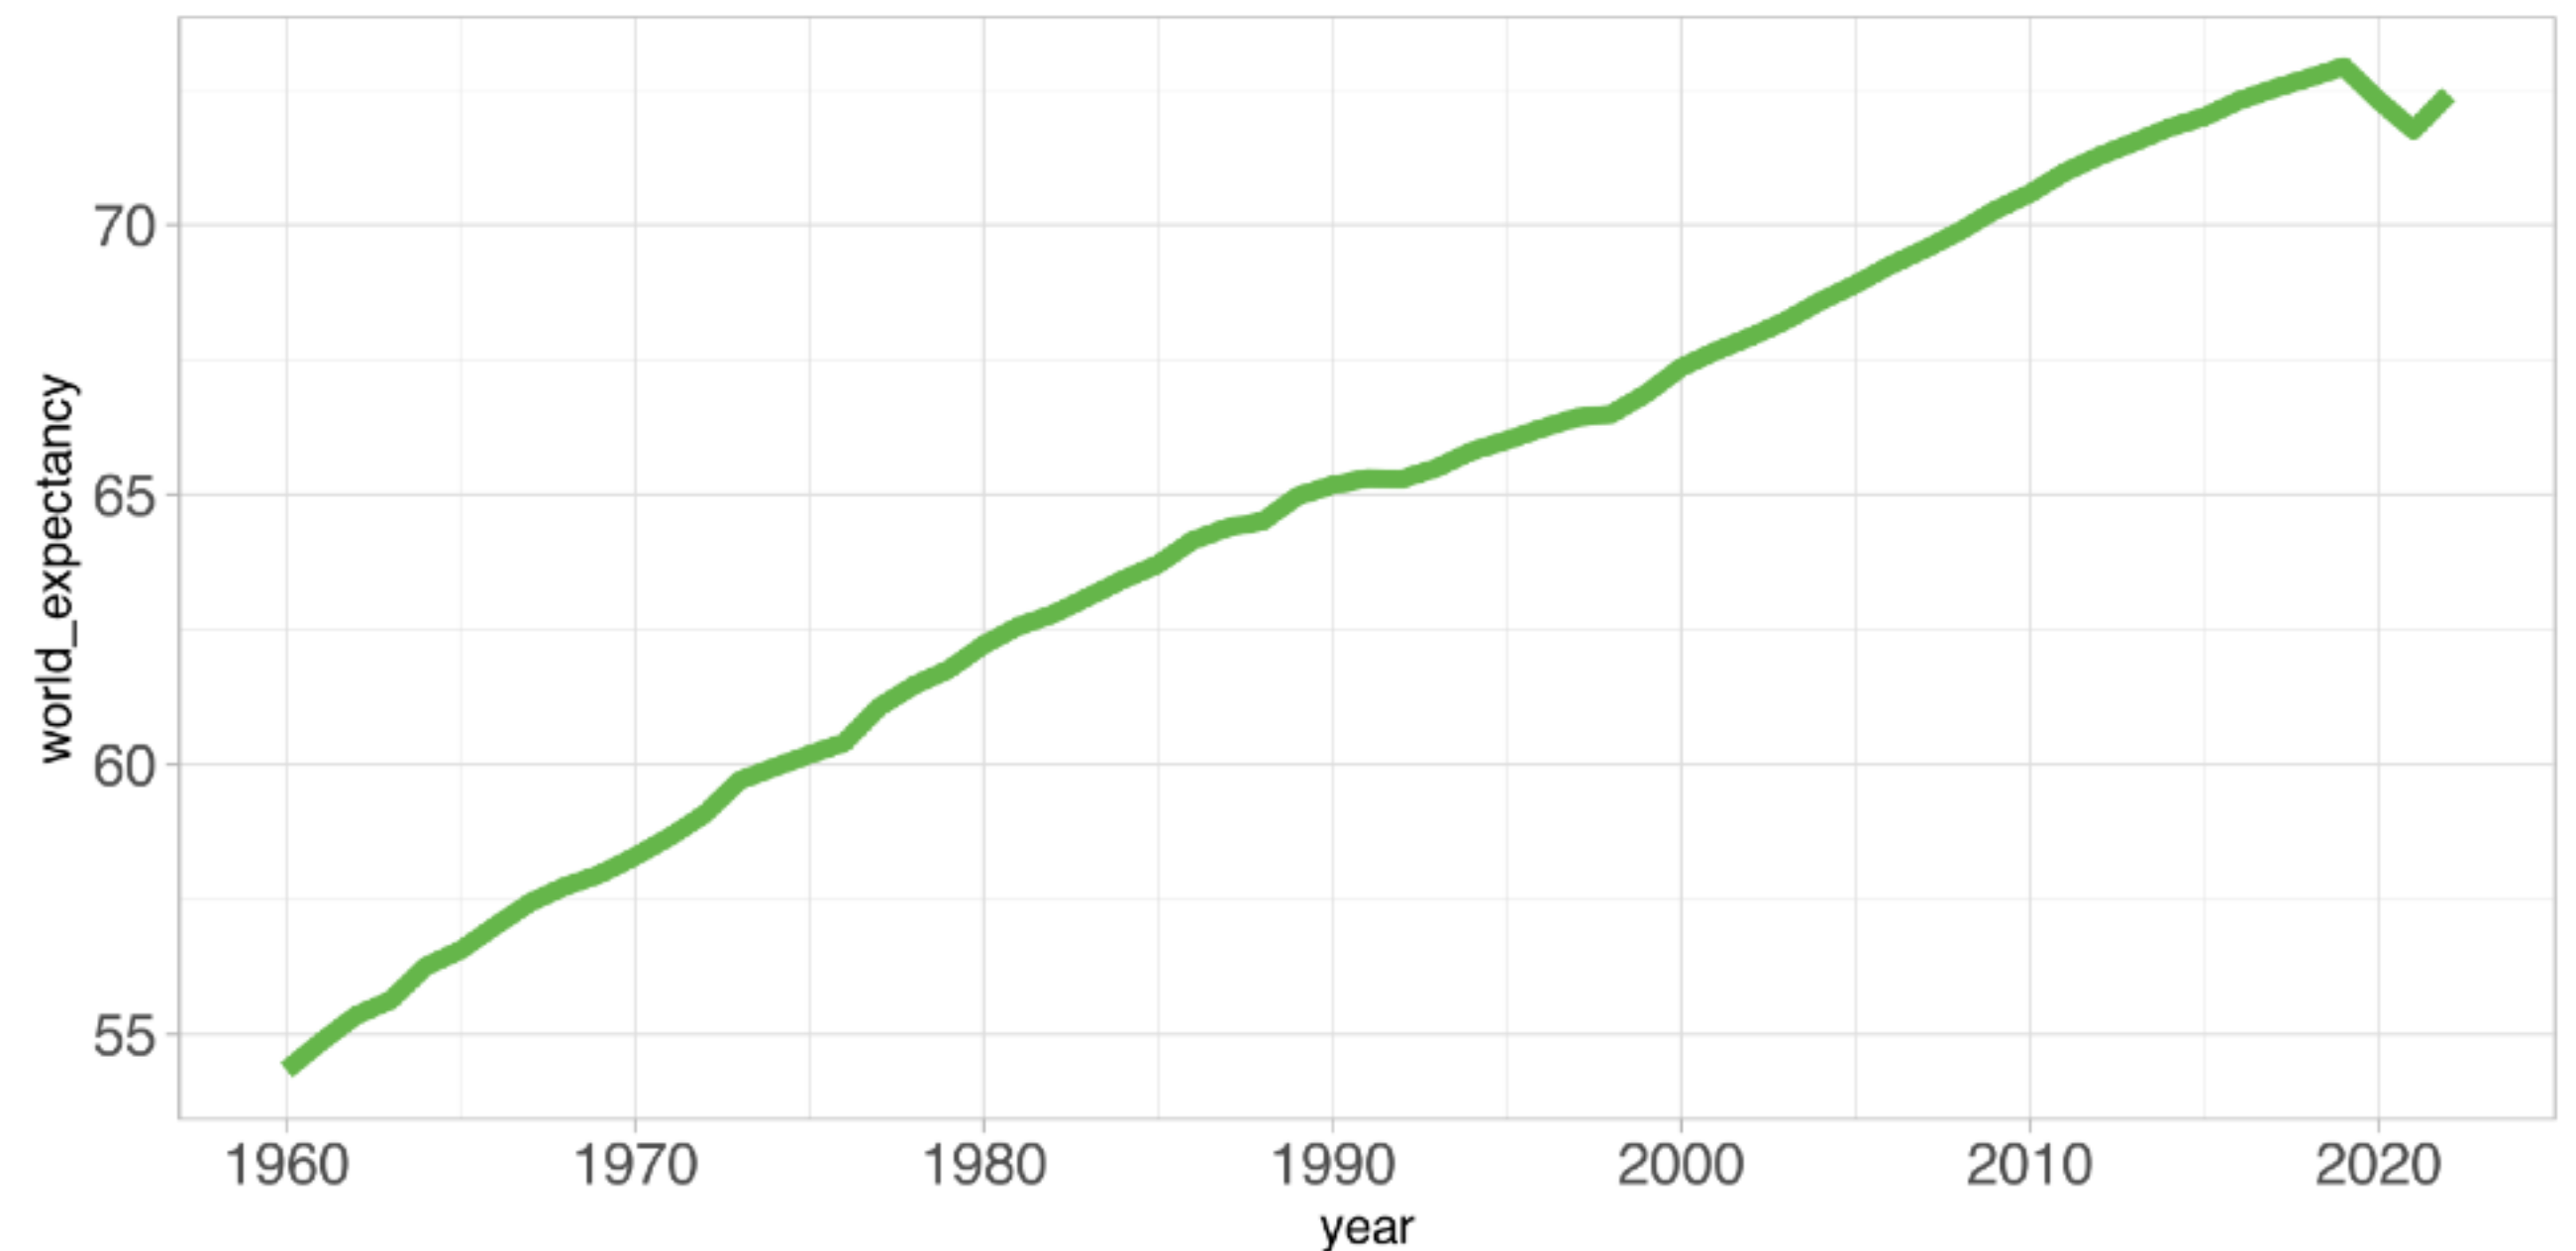

Reasonable aspect ratio

Use aspect ratio (**visual**) to reflect **data** ratio

$y_{\text{diff}} = \sim 17$, $x_{\text{diff}} = \sim 10$, so $y:x = \sim 1.7$

35% increase $\approx 1/3 \approx 1:3$ aspect ratio

Scaling axes: outliers & skew
