Visual

Expressiveness

A multivariate dataset may be inexpressive in a single horizontal dot plot because multiple records are mapped to the same position.

Expressiveness

A set of facts is **expressible** in a visual language if the sentences (i.e. the visualizations) in the language express **all the facts in the set of data, and only the facts in the data.**

Effectiveness

A visualization is more **effective** than another if the information it conveys is **more readily perceived** than the information in the other visualization.
