

Vanishing colors (Trick effect)

Stare at the cross in the centre of this gif, and keep your eyes as still as possible- what happens?

A stationary stimulus in your peripheral vision fades away and disappears when you fixate on a central point for a period of time.

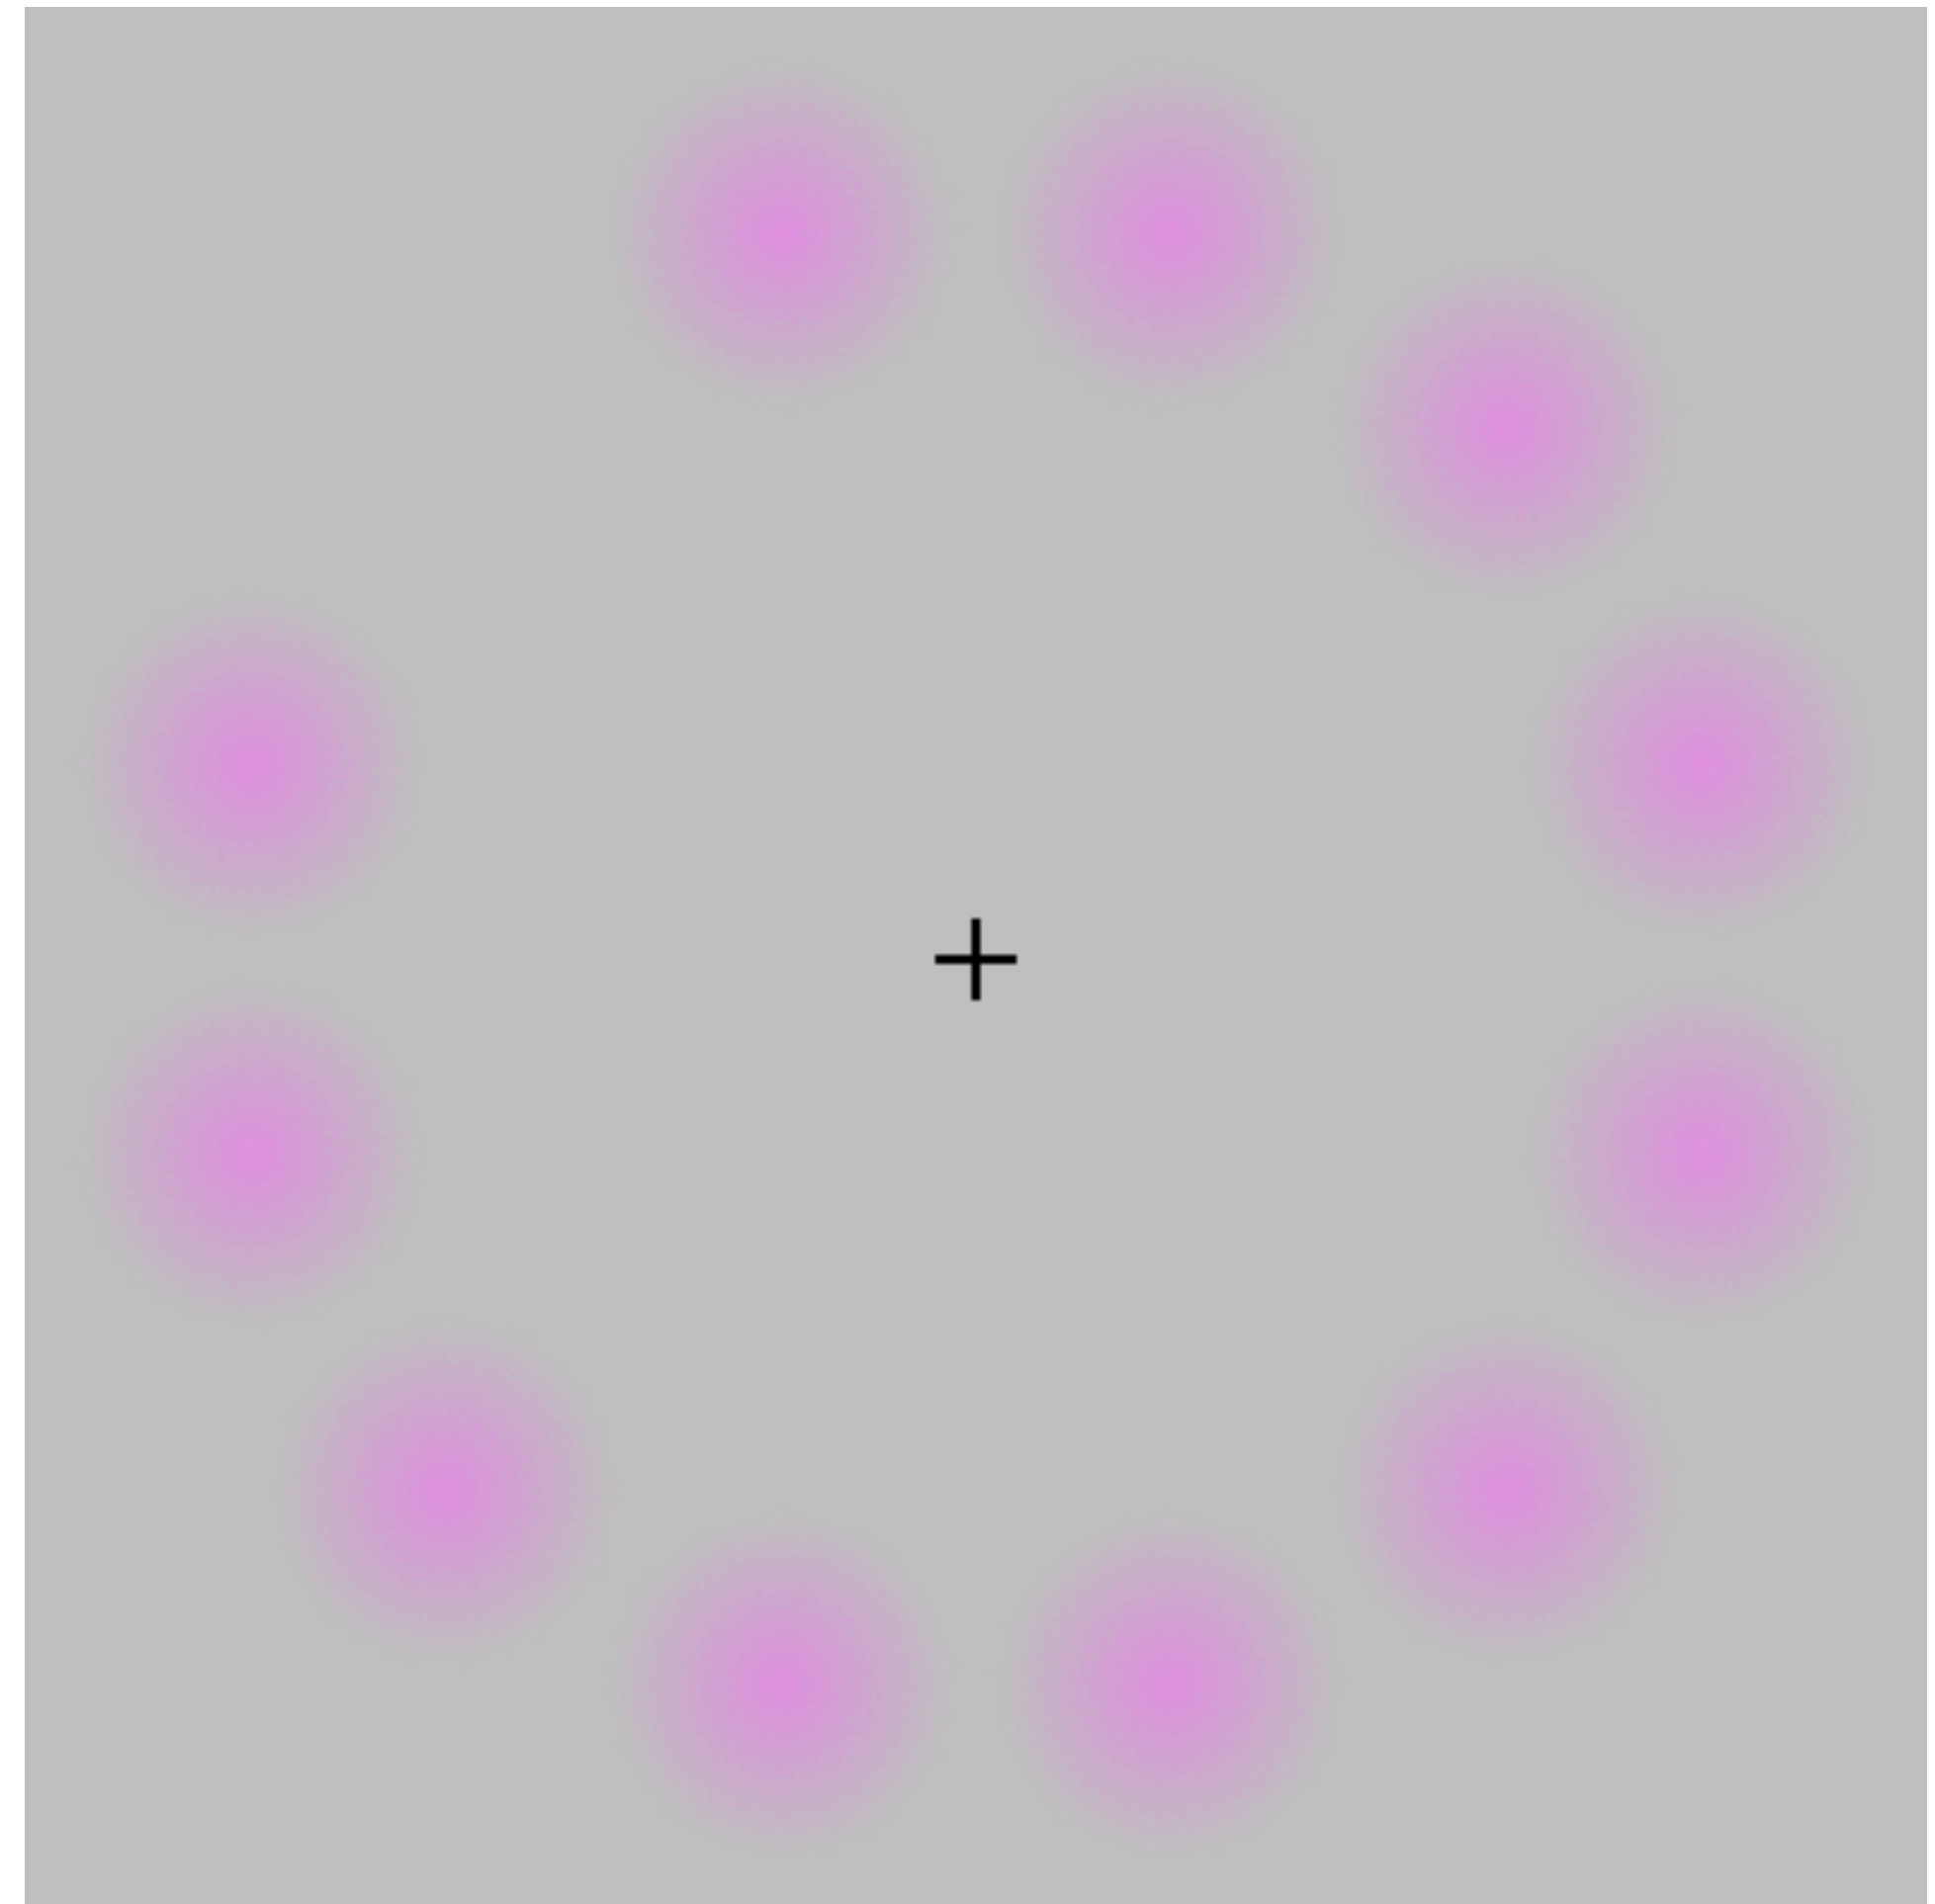

Vanishing colors (Troxler effect)

Stare at the cross in the centre of this gif, and keep your eyes as still as possible- what happens?

A stationary stimulus in your peripheral vision fades away and disappears when you fixate on a central point for a period of time.
