

CIE XYZ color space

Commission Internationale de l'Éclairage
(International Commission on Illumination)

One of the fundamental models in color science, truthfully represent colors as perceived by human vision

CIE xyZ color space

xyZ: a **chromaticity** model that isolates color (chromaticity) from luminance

$$x = \frac{X}{X + Y + Z}$$

$$y = \frac{Y}{X + Y + Z}$$

$$z = \frac{Z}{X + Y + Z} = 1 - x - y$$

Chromaticity diagram: project onto 2D
